Purpose

The Downstairs Can Line Tablet has been developed to improve digital tracking of packaging documentation and daily run tracking. This should alleviate the need for physical documentation which will help drive lower waste costs and improve B1C's file tracking systems.

Scope:

Packaging Operators will need to login to the tablet each day to submit their morning cleaning list, packaging run documentation and their nightly cleaning lists. These items will be automatically sent to SharePoint where review may be needed by the Packaging Manager.

Definitions/Acronyms:

- Tablet – iPad Generation 8
- DownstairsMorningChecklist – Morning sign off list for machine checks and cleaning.
- Today'sPackagingSplits – Packaging Splits for the day displayed on the tablet.
- CanPackagingDownstairs – The fillable form for the downstairs operator to use to perform hourly checks.
- DownstairsNightlyChecklist – Nightly sign off list for machine checks and cleaning.

Authorities/Responsibilities:

Packaging Manager (Authority)/Operations System Manager (Authority):

- **SOP and Password Ownership:** Holds authority over this procedure and the base level credentials contained within.
- **Master Level Restriction:** Maintains exclusive ownership of high-level master passwords; strictly forbids sharing master credentials unless approved by Packaging Manager and Maintenance Manager.
- **Physical Document Security:** Controls the printed copy of this SOP, ensuring it is kept in a secure and designated area of the packaging line.
- **SharePoint Governance:** Manages the future digital SOP migration, ensuring permissions are strictly locked to "View Only" for approved packaging and maintenance staff.
- **Credential Modification:** Authorizes and executes password updates directly on the machine HMIs and updates this document accordingly.

Packaging Line Operators (Responsibilities)

- **Standard Operation:** Input the shared operator password (found in Sections 1, under Procedures) to access the tablet.
- **Daily Documentation:** Inputting of daily operational information. This includes Morning and Nightly Cleaning lists and hourly forms.
- **Issue Escalation**: Notify the Packaging Manager immediately if the printed SOP is missing or if a machine rejects the shared operator login.

Resources and Materials:

- Tablet
- Charging Cable
- Power Brick

Procedures:

1. **Loging into the tablet**
   1.1. Ensure the tablet is on.
   1.2. Press the home button.
   1.3. Select “Use Passcode”.
   1.4. Enter Tablet Passcode – 1986.
2. **Starting the day – Morning Checklist**
   2.1. Select the DownstairsMorningChecklist icon on the main page of the tablet.

Image 1:

2.2. Proceed to fill out the form by entering your name and selecting either “Verified” or “Not Applicable” for each check.

2.3. Submit the form.

3. Reviewing the Packaging Splits – Packaging Split Webpage

3.1. Select the Today’sPackagingSplit icon from the main page of the tablet.

Image 2:

3.2. This screen is not interactive, but it is intended to display the packaging splits for the day.

3.2.1. If in need of reload, press the home button twice (quickly) and then swipe up on the page to remove it. Then reload the page for updates.

4. Entering hourly information – Hourly check forms

4.1. Select CanPackagingDownstairs icon from the main page of the tablet.

Image 3:

4.2. Each step needs to be completed as follows:

4.2.1. **Step 1 – Run info**

4.2.1.1. Fill out the date, the Batch number, the Job number (Deacom) fields and select from the drop down the Configuration.

Note: All the configurations packaging runs are in this section.

Image 4:

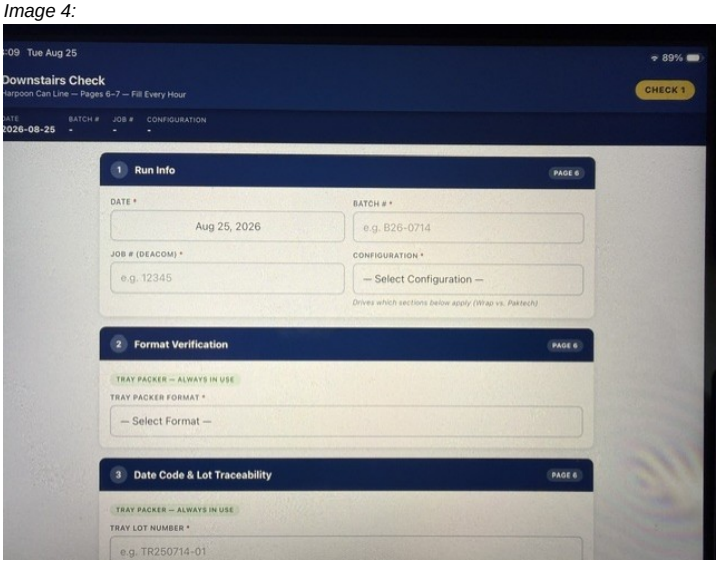

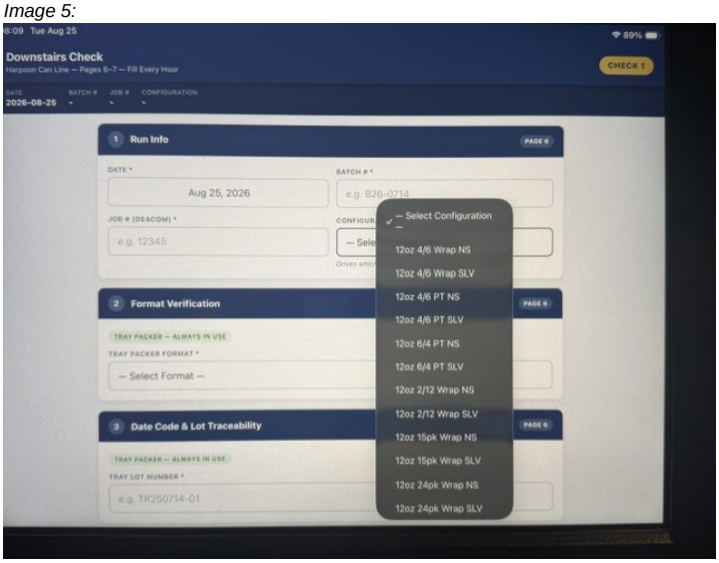

Image 5:

4.2.2. **Step 2 – Format Verification**

4.2.2.1. Ensure the machines in use have the correct format selected to match the configuration.

Image 6:

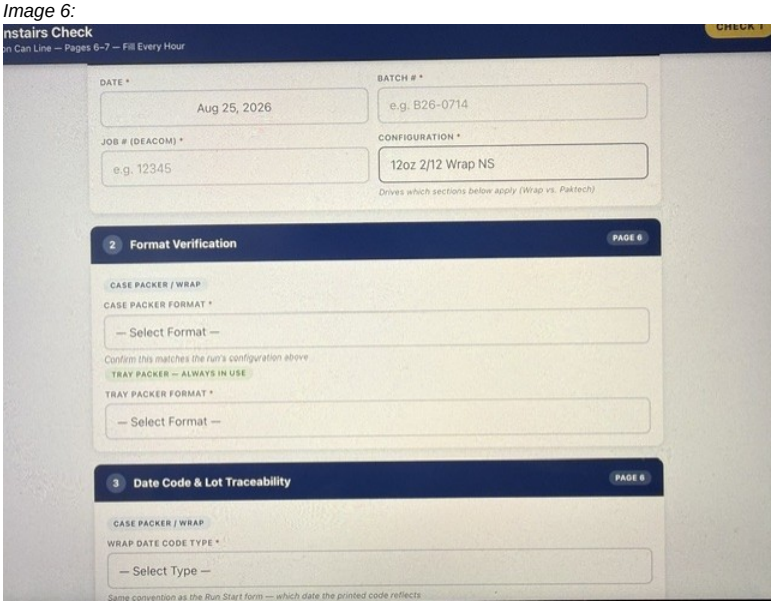

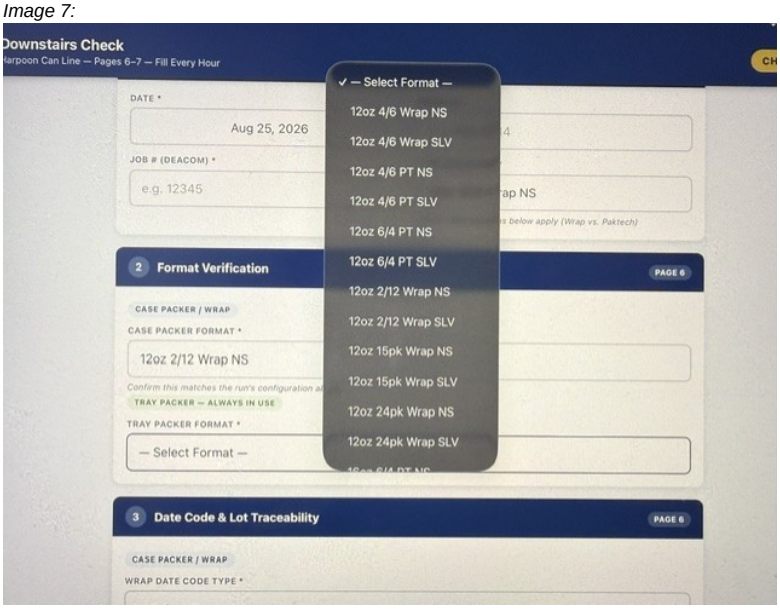

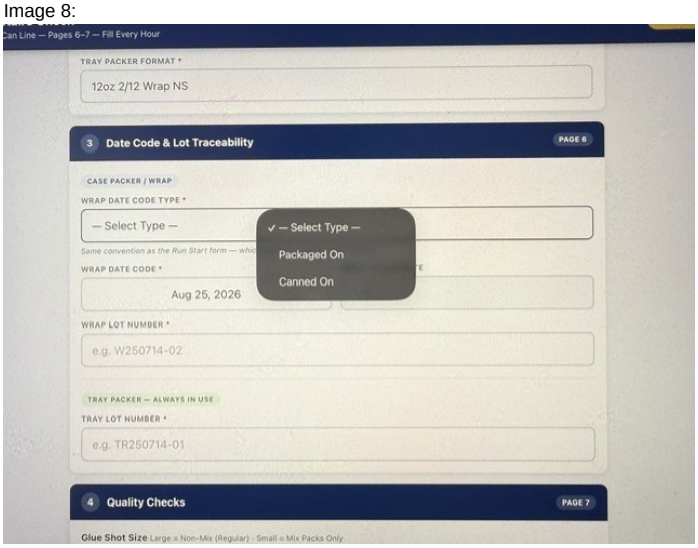

Image 7:

4.2.3. **Step 3 – Date Code & Lot Traceability**

4.2.3.1. Enter in the applicable lot numbers in their designated sections for each hour used.

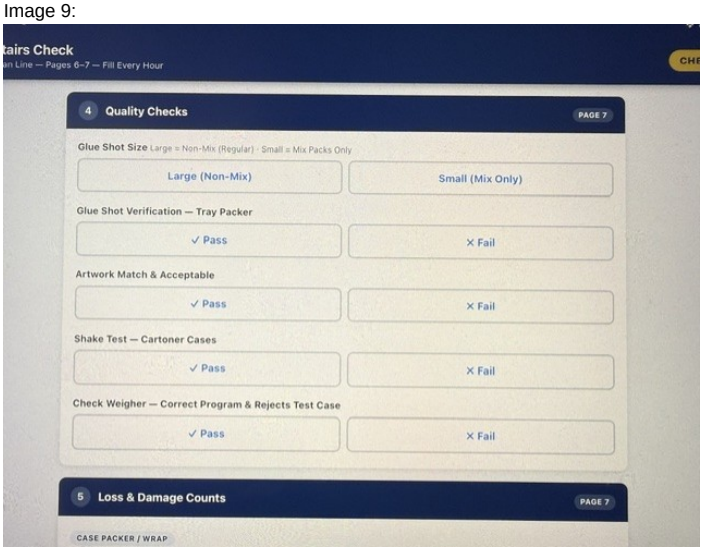

Image 8:

4.2.4. **Step 4 – Quality Checks**

4.2.4.1. Perform all quality checks and select which bubble is applicable.

Image 9:

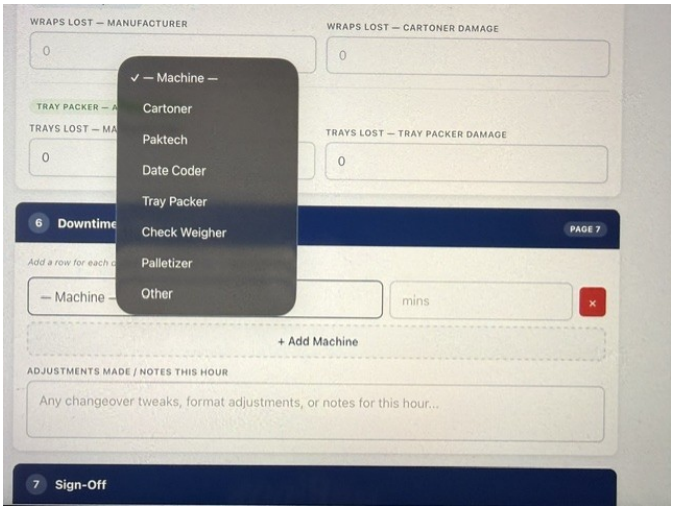

4.2.5. **Step 5 – Loss and Damage Counts.**

4.2.5.1. Each hour or at the end of the run (last hour), enter the loss counts into their corresponding fields.

4.2.6. **Step 6 – Downtime -Downstairs**

4.2.6.1. Here you can add any known downtime by selecting “+ Add Machine” and then selecting the machine from the scrolling menu and entering the downtime minutes into the box next to it.

Image 10:

4.2.6.2. You can also type out any downtime notes in the field below.

4.2.7. **Step 7 – Sign-Off**

4.2.7.1. Here is where you will select the time of the hourly check and you will need to enter your initials.

4.2.8. **Step 8 – Submit check**

4.2.8.1. Select submit check.

4.2.8.1.1. This will pop up a secondary check form asking if you would like to edit your information or if you would like to proceed to the next hour.

4.2.8.2. Repeat steps 2-8 for as many hours needed.

4.3. **Step 9 – Ending the run**

4.3.1.1. Once you have submitted the last hourly check, select “Next hour” and then scroll to the bottom of the screen and select “End Run”.

4.3.1.2. This will end the run and ask if you are done for the day or ready for the next run.

4.3.1.3. Select next run if there is another packaging run (re-do steps 1-8).

4.3.1.4. Select “End Day” if it is the end of the day.

4.3.1.5. If End Day is selected, it will pop up a message. From there press the home button twice (quickly) and swipe up on the tab to remove it from the screen.

5. Ending the day – Nightly Checklist

5.1. Select the DownstairsNightlyChecklist icon on the main page of the tablet.

Image 11:

5.2. Proceed to fill out the form by entering your name and selecting either “Verified” or “Not Applicable” for each check.

5.3. Submit the form.

6. Securing the tablet

6.1. Ensure at the end of the day the tablet is cleaned and set up for charging.

Forms:

- Forms are tablet based only.

Reference Documents:

- Refer to video SOP document - WIP

Common Issues:

- If any issues arise, please reach out to the Operations Systems Manager and the Packaging Manager as this tablet is a hard-coded item. Please revert to paper documentation until the tablet is back online and working.
